We always have every spring small quantities of several varieties of evergreens in pots that are priced from \$1.00 to \$2.00 each.

GROWING OF EVERGREENS

EVERGREENS ARE NOT HARD TO GROW. All they need is a little reasonable care—and most of this care is water and a little cultivation. Water is very important, as 70 per cent of evergreens that die is from lack of WATER. One good watering, once a week, is much better than watering every day, and when you water put 10 to 15 gallons of water to each tree—but don't wet the tops.

ALL OUR EVERGREENS ARE GROWN AT THE NURSERY IN ALPHA. They are all fresh dug from our fields. This is very important, as evergreens dry out fast, and if they are out of the ground very long, they will be a sure loss.

IT WILL PAY YOU TO BUY EVERGREENS FROM THE GROWER.

JUNIPERS

These are upright Junipers, can be trimmed into any shape, and should be trimmed every spring, March or April.
